Students at the Southwick School during an Artist in Residence with [Segun Olorunfemi](#)

Dear NH Teaching Artists,

We ask for your help in documenting the many Artist in Residence experiences that are happening across NH. We have [created an online form](#) where you can share with us any in-school or out of school residency work you are engaged in. Teaching Artists create valuable and memorable experiences for NH's youth. By capturing the scope and impact of these residencies, we will be better able to encourage more opportunities and more funding. Please bookmark the link to this form and update us whenever you confirm a new residency. We are interested in any residencies you have completed 2016-the present. **This extra bit of work on your part will contribute to a stronger field of Arts Education across the state.** We also hope to use this information to better connect you with other teaching artists.

Artists Residencies create an in-depth experience for students to work with professional artists. These are unique opportunities enrich the curriculum and help students expand their idea of what is possible and what they are capable of. While in residence, artists help students demonstrate curriculum competencies, 21st century skills, self-confidence and personal growth.

Thank you for all you do!
