PUSH THE SOUND

More than ever before, students are connecting to music through technology. Push The Sound helps educators connect to students through a curriculum designed to appeal to students' modern musical interests.

Push The Sound

Push The Sound is a New Hampshire based company offering state-of-the-art music technology lessons and videos for school students alongside professional development opportunities for teachers.

Push The Sound

Push the Sound believes every student is a musician. Learn more by clicking the image below.

RESTORING, EXPANDING, AND INNOVATING MUSIC EDUCATION

ANNOUNCING YEAR 2 NEW HAMPSHIRE ROCKS: MODERN BAND IN THE GRANITE STATE

The world of music expands through innovation. We ensure that music education does as well.

The New Hampshire Dept. of Education, in partnership with Little Kids Rock, announces Year 2 of our partnership to expand and innovate music education in our schools. New Hampshire's first cohort of Modern Band teachers finished out a highly successful year of training, content expansion, and student engagement. We hope to replicate in year 2, expanding the reach of modern band opportunities for teachers and students across the state.

"Using genres including rock, pop, Latin, and rap, our program empowers teachers to build music programs as diverse as the kids they serve. Our students see themselves reflected in their classes, which strengthens their connection to their school, their peers, and their community." Little Kids Rock also donates necessary instruments, and curriculum, meeting a key need of many school music programs.

Are you interested in submitting a grant proposal? Please indicate your interest here. More information about the status of this opportunity and how to apply for the grant will be distributed later this summer, exact timeline to be determined.

New Hampshire Teachers Share Their Modern Band Experience

Although this year is very different than most years ahead/behind it, the overall value of the education and program support opportunities have been remarkable!

I absolutely recommend Modern Band. It's an amazing program that gives students an opportunity to learn more than just traditional band instruments, and gives my choral students an opportunity to learn instruments and sing in a modern band.

It is well organized and taught in a very simple non-discriminatory way that allows you to use the curriculum without taking away from the Choral or Wind Instrument portion of the School Music program.

I would recommend this program and training as it really helps teachers understand the 'why' modern band and it offers a lot of projects, structures and scaffolding that will directly benefit student learning.

I would recommend this program because it teaches how to teach. It addresses learning at multiple levels at once and how to make students feel confident and successful. The course itself is fun and invigorates educators to share their passions.

COOL STUFF TO KNOW

The **California Department of Education's AME Institute (AMEI)** is the **biggest Arts, Media, and Entertainment professional learning event of the year**. Don't miss an incredible line-up of speakers, sessions, externships, extended learning opportunities and an Expo Hall showcase of the latest in entertainment industry focused teaching and learning. [Registration for the 2021 AME Institute is live](#) and has just been opened for a national audience! There are limited seats available for our AME-exclusive virtual externships and workshops, so make sure you register early to get your first pick. The AMEI theme this year is **Strong Pathways, Strong Pipelines: Power Through Partnership**, and the conference takes place **June 21-23, 2021**

MASTER OF EDUCATION IN INTEGRATED ARTS AT PLYMOUTH

IN5560.OL1 ST: **Teaching World Music, Arts and Culture** taught by Randy Armstrong at his Beauty Hill Studio in Barrington, NH

- Explore over 300 World Instruments with Master Musician Randy Armstrong!

IN 5700.OL **Integrated Arts Curriculum Development and Assessment**

•A core course in the MEd in Integrated Arts, students have loved working with Jule on developing their curriculum through the arts

AR5300.01 **The Arts in Society** taught by Anna Nuttall

- A core course in the MEd in Integrated Arts, Anna does a great job helping to unpack the important role the arts play in our world

IN 5200.01 **Multi-Disciplinary Arts Experiences for Children** taught by Trish Lindberg

- A chance to develop an individually designed arts project for your classroom or school
